Bought the pack and did not recieve anything. Love racing in the "Safety Car" Merc SLS AMG, it's fun to make the AI slow down.
In general this DLC has limited features for me. It only has the Mercedes cars added to the list. The White Ravenwest liveries are sexy and nice to drive with though :). just dont buy this game, physics are crap, ai is not bad but aint intelligent. it is a very dissapointing title. What do you get the GRID Autosport fan that has everything? Well, this isn't in the Season Pass, so... yeah, probably this. This pack provides absolutely nothing useful in the single-player campaign, gives no major advantage in multiplayer, and serves entirely to be cosmetic (besides the one included car, which is pretty rad). If you are well aware of this, and just want a little something extra to spice up your game, then yeah, you could do way worse.

The Ravenwest (White) liveries are usable online and in local multiplayer\/singleplayer, and look really sleek and stylish. They're bright and highly visible without being distractingly so.) The sponsors look pretty neat on custom paint jobs online, and have goals mostly accessible with sponsors in the game by default anyhow. And the Mercedes is no game-breaker, fitting neatly in as an option online and in local play.

In short, it's cool cosmetic stuff and a single new car. No more, no less. I wouldn't recommend it over any of the other DLC packs, but if you play this game a ton, you'll get your money's worth on this eventually, especially on sale.. White Ravenwest liveries are pwetty and make you leet, Mercedes is destroyed by others in its class.
4\/8.5 Shame there isn't a "meh" review button. Love the benz black series and all the skins for the cars. only get it if you really want it.. It makes some cars all black and sexy and stuff. The Mercedes is pretty nice. Yeah. It's alright.

good car pack!

95\/100 worth. Sexy white liveries, but wasn't this supposed to be a pre-order only DLC?

whatever
